

Cookie Policy

Use of cookies

Our Website uses cookies. We use cookies to gather information about your computer for our services and to provide statistical information regarding the use of our Website. Such information will not identify you personally - it is statistical data about our visitors and their use of our Website. This statistical data does not identify any personal details whatsoever.

We may also gather information about your general Internet use by using a cookie file. Where used, these cookies are downloaded to your computer automatically. This cookie file is stored on the hard drive of your computer, as cookies contain information that is transferred to your computer's hard drive. They help us to improve our Website and the service that we provide to you.

All computers have the ability to decline cookies. This can be done by activating the setting on your browser which enables you to decline the cookies. Please note that should you choose to decline cookies, you may be unable to access particular parts of our Website. Where we work with advertisers on our Website, our advertisers may also use cookies, over which we have no control. Such cookies (if used) would be downloaded once you click on advertisements on our Website.

What is a cookie?

A cookie is a small amount of data, which often includes a unique identifier that is sent to your computer or mobile device (referred to here as a "device") browser from a website's server and is stored on your device's hard drive. Each website or third party service provider used by the website can send its own cookie to your browser if your browser's preferences allow it, but (to protect your privacy) your browser only permits a website or third party service provider to access the cookies it has already sent to you, not the cookies sent to you by other sites or other third party service providers.

A cookie will contain some anonymous information such as a unique identifier and the site name and some digits and numbers. It allows a website to remember things like your preferences or what's in your shopping basket.

What is a browser?

A browser is an application that allows you to surf the internet. The most common browsers are Chrome, Internet Explorer, Firefox and Safari. Most browsers are secure and offer quick and easy ways to delete information like cookies. Please see the section below Change your Browser Settings

What do cookies do?

Cookies record information about your online preferences and allow us to tailor the websites to your interests. Information supplied by cookies can help us to analyse your use of our sites and help us to provide you with a better user experience. For example, you may choose to personalise the content of a website in order to see the latest news and weather for your region. In order to do this, a cookie is placed on your device to remember where you

live so that we deliver the information that has been requested by you. This is a prime example of how cookies are used to improve your experience of a website.

Change your Browser Settings

You can choose how cookies are handled by your device via your browser settings. The most popular browsers allow users to a) accept all cookies, b) to notify you when a cookie is issued, or c) to not receive cookies at any time. If you choose not to receive cookies at any time, the website may not function properly and certain services will not be provided, spoiling your experience of the website. Each browser is different, so check the “Help” menu of your browser to learn how to change your cookie preferences.
